PROFESSIONAL EXPERIENCE

Senior Android Developer

Reldyn Sdn Bhd

Apr 2022 - Present
Kuala Lumpur (Remote)

- Lead Android development for **Be U by Bank Islam**, a fully digital banking app with DuitNow QR payments, savings goals, and microtakaful features
- Designed and implemented new features aligned with user needs, ensuring compliance with banking security standards
- Optimized app performance and resolved critical bugs, maintaining high app stability and 4+ star rating
- Integrated payment APIs, social login, and third-party services for seamless user experience
- Collaborated with QA team on comprehensive testing to ensure production-ready releases

Freelance Mobile Developer

Self-Employed

2021 - Present
Remote

- Delivering Android, iOS (Swift/SwiftUI), and Flutter apps for clients across fintech, e-commerce, travel, and government sectors
- Successfully shipped 30+ production apps with combined downloads exceeding 2M+
- Working with international clients from Malaysia, Singapore, Indonesia, and Finland

Android Engineer

GetGo Technologies Pte. Ltd

Mar 2021 - Mar 2022
Singapore (Remote)

Singapore's largest car-sharing service with 3,000+ vehicles

- Developed new features using **Jetpack Compose with MVVM Clean Architecture**
- Led UI modernization by migrating legacy XML layouts to Jetpack Compose, improving code maintainability
- Wrote and maintained unit/UI tests ensuring code quality and reducing regression bugs
- Managed Google Play releases and ensured app security compliance

- Collaborated with cross-functional teams across multiple time zones

Mobile Application Developer

XeerSoft Sdn Bhd

Nov 2019 - Feb 2021

Kuala Lumpur (Remote)

- Delivered **10+ production apps** across Android, iOS, and Flutter for e-commerce and enterprise clients
- Owned full app lifecycle from concept and design to development, testing, and Play Store deployment
- Built e-commerce platforms, membership apps, and ERP systems serving multiple businesses
- Ensured app compatibility across Android versions and device types
- Integrated REST APIs, payment gateways, and backend services (PHP/MySQL)
